## Early Life of Jawaharlal Nehru

1. Jawaharlal Nehru was born on November 14, 1889 in Allahabad.
2. He received his early education at home under private tutors.
3. At the age of fifteen, he went to England and after two years at Harrow, joined Cambridge University where he took his trips in Natural Sciences.
4. He was fond of children and was lovingly known as "Chacha Nehru" by them. His deep affection for the younger generation was reflected in his efforts to improve education and uplift the lives of children across the nation.

- Children's Day is a magical time just for us - the little dreamers and adventures! It's a day to celebrate our laughter, innocence, and big dreams.
- It reminds us how loved and special we are, but I hope every child feels this way every day. Let's promise to spread kindness and create a world where every child can smile and dream freely

I love children's day because, it's all about us! It reminds everyone that kids are special and need to be loved and cared for!

## Constitution of India

The constitution of India is the supreme law of the country. It was adopted on 26th November 1949 and came into force on 26th January 1950. The constitution drafted by the constituent assembly under the leadership of Dr. B.R. Ambedkar, it is the longest written constitution in the world. It took around 2 years 11 months and 15 days to be completed. Constitution assures justice, equality and liberty to every citizen of India. Many features of the Indian Constitution take from the other constitutions of the world. The constitution of India guides and makes the government system work smoothly. The constitution of India is not just a legal document but a living testament to the vision of its framers. It is our duty to respect and uphold the principles enshrined in this monumental document..

# Facts about Endangered Species

- *\*In North America alone, there are 500 species that have disappeared in the last 400 years.*
- *There are only about 300 Siberian tigers left in the world.*
- *Polar bears are getting sick and dying because of warm weather.*
- *Scientists estimate we're now losing species at 1,000 to 10,000 times the "background" rate, with dozens going extinct every day.*
- *As many as 30 to 50 percent of all species are possibly heading towards extinction by mid century.*
- *Some endangered species have fewer than 100 individuals in the world.*
- *Duuman activities, plants and fungi can also be endangered.*
- *More than 16,000 of the nearly two million documented Species on our beautiful planet are currently classified as endangered.*
